---

### WORK HISTORY

**Full Stack Web Developer**, 01/2024 - Current

**Freelance** – Remote

- Used Javascript, SQL and HTML to develop app-solutions.
- Increased website performance by optimizing front-end and back-end code for faster loading times.
- Applied responsive design principles to ensure consistent display and functionality across a wide range of devices, including mobile phones, tablets, and desktop computers.
- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.
- Developed user-friendly web forms with validation and error handling.
- Developed functional databases, applications and servers to support websites on back-end.
- Worked with back-end developers to design APIs.
- Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.
- Reviewed code, debugged problems, and corrected issues.

**WordPress Designer**, 12/2024 - 12/2024

**PT Asamedia** – Remote

- Developed user-friendly web forms with validation and error handling.

- Proved successful working within tight deadlines and a fast-paced environment.
- Optimized web applications for speed, scalability and security.
- Collected, defined and translated user requirements into project designs and implementation plans.
- Provided front-end website development using WordPress, Hubspot, and other editing software.
- Adhered to SEO best practices while designing sites.
- Implemented custom post types and taxonomies to organize content effectively on various WordPress websites.

## Technical Support Intern, 09/2023 - 01/2024

### EFishery – Bandung

- Generated reports to track performance and analyze trends.
- Tested new software and hardware prior to deployment.
- Researched and identified solutions to technical problems.
- Collaborated with cross-functional teams to identify, analyze, and resolve software defects, improving overall product quality.
- Build Whatsapp Bot Reminder
- Build SLA Scraper Slack Bot
