

Muhamad Ramadhan

Full Stack Developer

Bekasi, Indonesia, 17530 | +6289678449941 | muhamad.ramadhan.dev@gmail.com | www.hollyycan.com | www.github.com/holycann | www.linkedin.com/in/muhamad-ramadhan-bb6289237

SUMMARY

A Full Stack Developer & Automation Engineer with a strong interest in clean code, scalable architecture, and practical automation. Actively building and exploring end to end web systems using Go, Node.js, PHP, React, Next.js, and Laravel. Comfortable working with relational databases like PostgreSQL, MySQL, and MariaDB, as well as NoSQL systems such as Firebase and Firestore. Experienced in creating and consuming RESTful API, implementing responsive design, and working with modern UI component libraries. Familiar with key development workflows including version control (Git), API testing (Postman), and task management tools (ClickUp, Notion). Often leverages AI tools like ChatGPT to support debugging, syntax refinement, and technical learning. Has worked on real world projects in both freelance and internship environments, handling deployment automation (AWS EC2, Vercel), WordPress CMS, and cross platform development using React Native. Committed to continuous learning and building production ready, maintainable, and user focused web applications.

EXPERIENCE

Freelance – Remote, Indonesia

Full Stack Developer (Jan 2024 - Present)

- Developed and delivered various client projects including websites and applications using HTML, CSS, JavaScript, Laravel, and WordPress.
- Worked with both SQL (MariaDB) and NoSQL (Firebase) databases to support dynamic and scalable applications.
- Built mobile friendly web interfaces and a cross platform app using React Native to meet specific client requirements.
- Continuously exploring modern technologies such as Next.js, PostgreSQL, and Docker through personal and internal projects to expand development capability.

eFishery – Bandung, Indonesia

Tech Support Intern (Sep 2023 - Jan 2024)

- Acted as the first level support for both system and field related bugs, providing initial handling based on internal documentation or self-analysis before escalating unresolved issues to the engineering team.
- Managed defect tracking and documentation using ClickUp, including monthly analysis, SLA measurement, and collaboration with the team to identify recurring issues and drive process improvements.
- Participated in black box testing for internal applications to ensure functionality and user experience before deployment.
- Developed a WhatsApp automation bot to remind field teams to report operational issues, improving reporting consistency and communication.

EDUCATION

Widyatama University (2022 - 2026)

Bachelor Of Information System - GPA 3.74 / 4.00

INTI International University, Malaysia (Jan 2025 – Mei 2025)

Completed one semester academic exchange focused on international collaboration, academic learning, and cultural adaptation.

SKILLS

- Backend Development: Go, Node.js, PHP
- Frontend Development: React, Next.js, Laravel, HTML5, CSS3, JavaScript, TypeScript
- Database: PostgreSQL, MySQL, MariaDB, Firebase
- DevOps & Deployment: AWS EC2, Azure VM, Vercel, Cloudflare, Cloudinary
- Tools & Workflow: Git, GitHub, Postman, Notion, ClickUp, Figma, Canva
- CMS & Platforms: WordPress
- Soft Skills: Problem solving, Analytical thinking, Technical documentation
